The density is a weighted sum
$n = 400$ draws, colored by the hidden Z
Density
πf_1, $\pi = 0.3$
$(1-\pi) f_2$
mixture $f = \pi f_1 + (1-\pi) f_2$
$Z = 1$: from f_1 (121 draws)
$Z = 0$: from f_2 (279 draws)
