Density of $\bar{X}_n$: it collapses on μ
Density
$\mu = 1$
$n = 1$
$n = 4$
$n = 16$
$n = 64$
$\bar{X}_n$
Density of $\sqrt{n}(\bar{X}_n - \mu)$: it settles down
$n = 1$
$n = 4$
$n = 16$
$n = 64$
Gauss$(0, \sigma^2)$
$\sqrt{n}(\bar{X}_n - \mu)$
