One-sided and two-sided, $n = 124$
H_0: $p = \frac{1}{2}$
one-sided:
reject if
$n\bar{R}_n \geq 72$
power 0.943 at $p = 0.645$
two-sided: ≥ 74 or ≤ 50
level 0.05
$\Pr_p(\psi = 1)$, probability of rejecting
True p
More data, steeper curve
$n = 124$, threshold 72
$n = 30$, threshold 20
True p
