the n draws of one experiment ⟶ average along the row: $\bar{X}_n$
repetitions (all possible outcomes, weighted by probability)
run 1 0 1 0 1 1 0 1 1 0 0 $\bar{x}_{10} = 0.5$
run 2 1 0 0 1 0 0 1 1 0 1 $\bar{x}_{10} = 0.5$
run 3 1 0 1 1 1 1 0 1 1 1 $\bar{x}_{10} = 0.8$
run 4 0 1 0 1 1 1 1 1 1 1 $\bar{x}_{10} = 0.8$
run 5 1 1 0 0 1 1 0 1 1 1 $\bar{x}_{10} = 0.7$
run 6 0 0 0 1 1 1 0 1 1 1 $\bar{x}_{10} = 0.6$
run 7 1 0 1 0 1 1 1 1 0 1 $\bar{x}_{10} = 0.7$
run 8 1 1 1 1 0 0 0 1 0 1 $\bar{x}_{10} = 0.6$
average down the column: $\mathbb{E}[\bar{X}_n] = p = 0.645$
